# CATALOGUE

**WELCOME TO NAXOS JAZZ LEGENDS AND NAXOS NOSTALGIA**, twin compendiums presenting the best in vintage popular music. Following in the footsteps of Naxos Historical, with its wealth of classical recordings from the golden age of the gramophone, these two upbeat labels put the stars of yesteryear back into the spotlight through glorious new restorations that capture their true essence as never before.

**NAXOS JAZZ LEGENDS** documents the most vibrant period in the history of jazz, from the swinging '20s to the innovative '40s. Boasting a formidable roster of artists who forever changed the face of jazz, Naxos Jazz Legends focuses on the true giants of jazz, from the fathers of the early styles, to the queens of jazz vocalists and the great innovators of the 1940s and 1950s.

**NAXOS NOSTALGIA** presents a similarly stunning line-up of all-time greats from the golden age of popular entertainment. Featuring the biggest stars of stage and screen performing some of the best-loved hits from the first half of the 20th century, this is a real treasure trove for fans to explore.

**RESTORING THE STARS OF THE PAST TO THEIR FORMER GLORY**, by transforming old 78 rpm recordings into bright-sounding CDs, is an intricate task performed for Naxos by leading specialist producer-engineers using state-of-the-art-equipment. With vast personal collections at their disposal, as well as access to private and institutional libraries, they ensure that only the best available resources are used. The records are first cleaned using special equipment, carefully centred on a heavy-duty turntable, checked for the correct playing speed (often not 78 rpm), then played with the appropriate size of precision stylus. Several transfers are often made of each disc to capture the finest reproduction – one side of the groove sometimes produces a superior sound to the other. The use of equalizers breathes new life into the music, producing what the engineer believes to be the sound heard at the original take. Finally, the latest digital noise reduction systems – including the remarkable 'Cedar' technology – remove the clicks, pops and crackle present in most 78 rpm pressings to achieve a stunning clarity and freshness of sound that brings the stars of yesteryear closer to us than ever before.
